

ГУО «Средняя школа №1 г.Новолукомля»  
Проект «Зелёная школа»

A close-up photograph of three ladybugs on a green stem. The stem is covered with several large, clear water droplets that are glistening in the sunlight. The background is a soft, out-of-focus green. The ladybugs are red with black spots, and they are positioned along the stem from left to right. The water droplets are arranged in a line, and each one has a bright, starburst-like reflection of light.
